PROJECTS

DEN DECOR

GitHub Link

A website similar to Flipkart, providing an e-commerce platform for clothing, appliances, grocery, and gadgets.

Features:

- Sorting and filtering
- Payment page
- Search bar
- User Authentication

Areas of Responsibility:

- Developed and designed the landing page for the website, ensuring an engaging and user-friendly interface
- Implemented the shopping cart page, allowing users to add, remove, and modify their selected items
- Designed and integrated the search bar functionality, enabling users to quickly find products based on their preferences

Tech Stack: HTML | CSS | JavaScript | JSON

A collaborative project build by team of 4 and executed in 5 days.

GLADSTOCKS

GitHub Link

A website similar to Zerodha, providing an e-commerce platform for purchase, and sell shares and stocks.

Features:

- User authentication for secure access to the platform
- Activity Dashboard providing a comprehensive overview of scheduled appointments and activities
- Activity Tracking to monitor and analyze user engagement and productivity
- Alerts/Notifications system to inform users about upcoming appointments and important updates
- Appointment Scheduling functionality for users to easily book and manage appointments

Tech Stack: Core JAVA | SpringBoot

A solo project within a duration of 5 days

Certifications

- Hackerrank Java basic certificate
